Advantage of Hindsight

Allen Dulles, former CIA director.

Because Castro in one of his rambling and incoherent speeches has boasted about early Marxist views, the "wise ones" are now saying that this should have been recognized years ago and action taken. Exactly what action they do not specify except for those who advocate open military intervention. But thousands of the ablest Cubans, including political leaders, businessmen, and the military, who worked hard to put Castro in and were risking their lives and futures to do so, didn't suspect that they were installing a Communist regime. Today they are in exile or in jail.
